

KIEWA STREET MARKET

July 2018 – Electrical Items – Test and Tag

In mid-June we indicated verbally to stallholders utilizing market provided power that we would be auditing for compliance, in early July.

This is a courtesy note to let you know we will be doing this over the next couple of Sunday markets. It is a condition of entry to the market that stall holders utilising electrical items in the provision of services, have those items “Tested & Tagged”. As part of our risk mitigation strategy we need to ensure that stallholders comply with this. This is consistent with the requirements of the significant majority of markets both locally and nationally, and is done to ensure the safety of all. Please provide access to your equipment when requested by a Rotarian as part of the audit.

This will assist in providing a safe market for all.
